It is astonishing to note the accuracy of the informa-tion possessed by the Mexicans of every movement of our troops. Not a regiment marches or counter-marches, not a reconnoitering party sallies forth, that a particular count of it is not transmitted at once to head-quarters. We find in the papers an account of every assailable or exposed point, and it is to this minuteness and accuracy of their information that we attribute the late success of Gen. Minon. That officer has nearly two thousand fine cavalry under his command, ready to pounce upon any detachment of our troops too weak to resist his attacks.

The rage of many of the Mexicans is unbounded that Santa Anna has not attacked our army in detail, when-ever an opportunity has offered. They deprecate a general action, now that the Americans are flushed with success and the Mexicans dispirited by reverses, as almost sure to be fatal to their national hopes, and even existence; and they do not spare Santa Anna in their in-

sinuations as to the motives which influence him. supplies of money and provisions, lest by their presence of War that he will begin offensive operations at the first the previous distress of the regular garrison should be favorable moment.

Speech of Gen. Cass. In the U. S. Senate, on the resolution to expel the Edi-

tor of the Union from his privileged seat.

Mr. Cass said: I regret the introduction of this subject, and still more the course of this discussion. I do not believe, and still more the course of this discussion. I do not believe, that the character of the Senate required any such aegis as this. That character is the property of the country, and amongst its most valuable property too. From the functions of this body, uniting portions of the legislative, judicial, and executive powers, and from the previous position of its members it must always exert con-iderable influence upon public opinion. But its influence will not be increased by measures like this. Its dignity will be better protected by its own course, than by the punishment of newspaper editors, or of newspaper writers, who may call in question its action, or the motives of its members. I do not say, sir, that a case may not arise, when it may be proper to inquire into assaults upon the character and conduct of the Lenate. But they must be strong ones—almost extreme ones—far different upon the character and conduct of the Lenate. But they must be strong ones—almost extreme ones—far different from this. For myself, I agree with the Senators from Ohio and Virginia, that the defensive power of this body is confined to cases where summary interference is necessary to protect it in the execution of its duties. This is the only tangible point. It is clear that the constitution confers no such power. As to our assuming it, because it is exercised in England by the legislature there, I reject the proposition, as one unworthy of our nation. Neither as a part of the common law, nor as the result of analogy, can we claim any such power. We have it as a part of the great law of self-They were expecting on and quatient.

I will only say, it is physically impossible; and for not do-ing what, as a general rule it is impossible to do, we have been upon the point of expelling the reporter. Had we acthave passed our judgment of expulsion, and then found that on the 15th, and one long to be remembered. the Mexicans in our war with them, and a kind of endorsement of those views in an editorial paragraph.
